We recommend straps that float the glasses. We have bottled water and eyeglass straps for sale.

Description

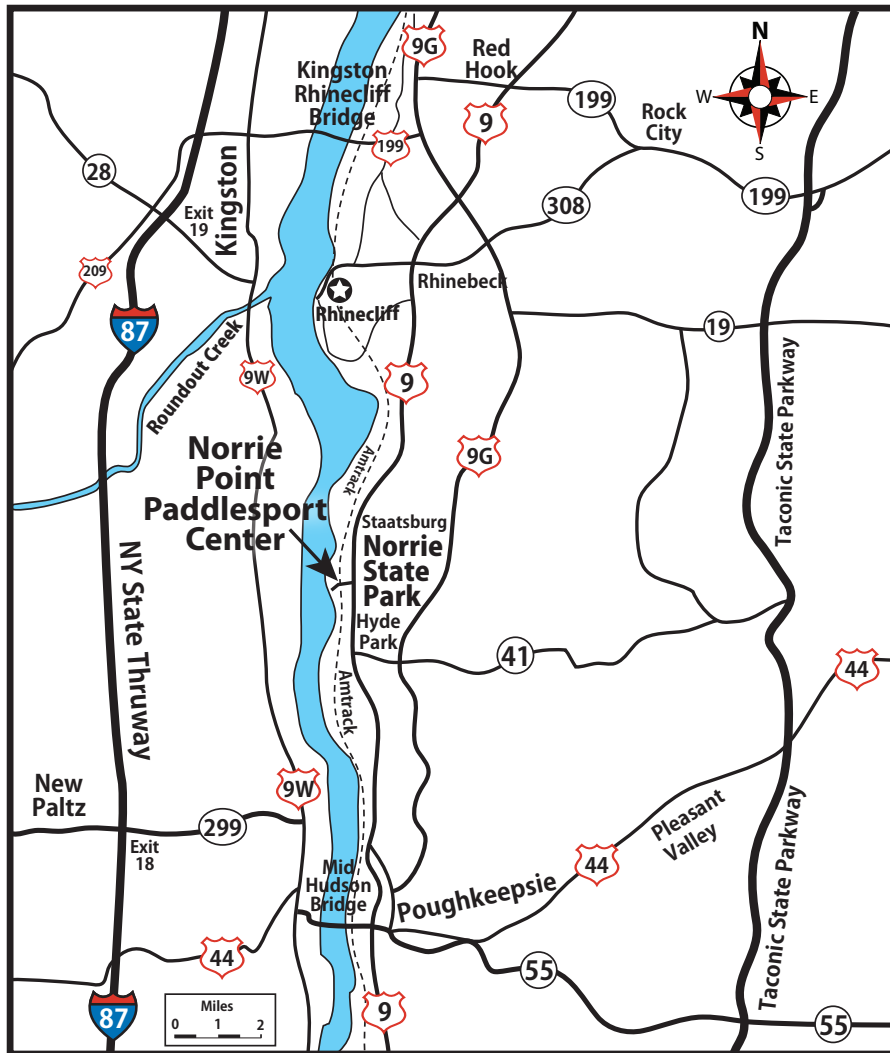

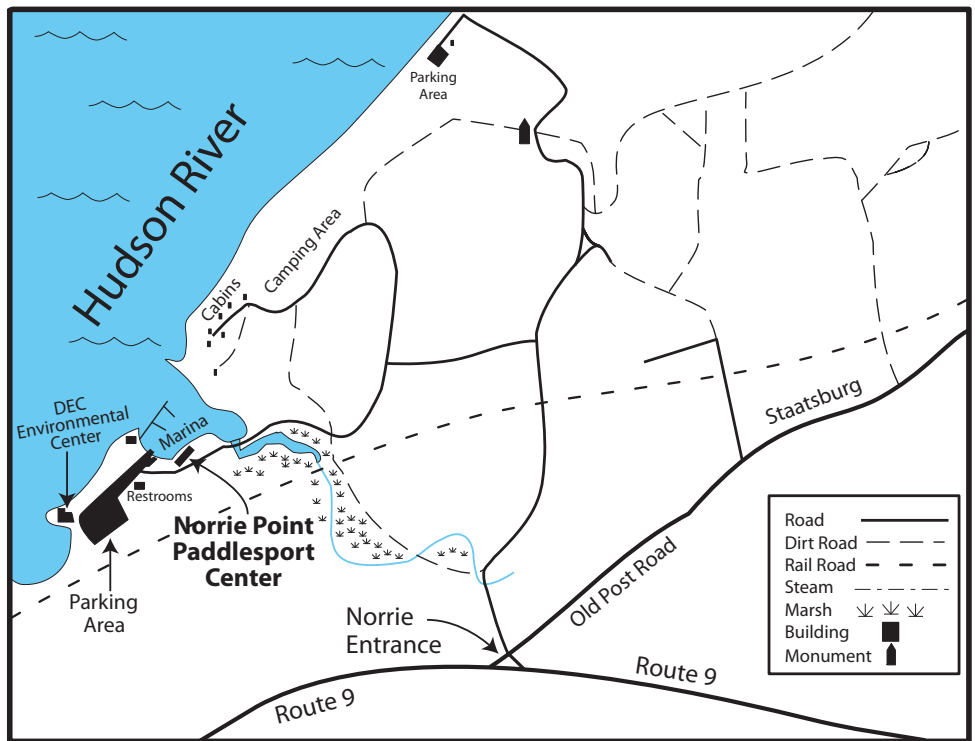

This program provides paddlers with the necessary safety awareness to ensure their safety and the safety of others.

In addition, it provides paddlers with the rescue skills they can use to help themselves and/or others in difficulty.

The rescue skills covered will include;

- Group rescues
- Self rescues
- Eskimo rescues
- All in rescue
- Rescuing a trapped paddler
- Short and long tows
- Swimming with your kayak
- Carrying a swimmer on your kayak
- Throw lines

and more.

If you have a tow line or throw bag, bring it. We will have a few for the group to share.

It is important to have the equivalent of our Core Techniques class skills and a willingness to capsized to get the most from this program.

Topics will include: Self and group rescues, safety equipment, communication, signaling equipment, effects of cold water, how to dress, towing, risk assessment, CLAP, manual handling and unknown incidents.

Self, Team, Victim, Equipment will be the protocol used throughout the program.

We will carry our lunch with us as we will teach on the go. Our lunch spot might be on Esopus Island, Mills Mansion, or the Vanderbilt mansion.

This is a program all kayakers should take more than once. Our staff loves to teach it as we get a chance to practice all of these skills. As long as you are happy in the water, it's a fun program to take.
